Personal Profile

As I mature as an Interaction Designer, I have developed a broad range of skills, both technical and personal. I have developed skills in human centre design and understand the close relationships between people, design and technology. I have a strong interest in methods that will raise emotional demand values and influence positive change creating new patterns of interactions through playful objects, user interface and human behaviour. I also have a keen interest in designing inclusive experiences that can meet empathy. I am looking to further my career in the field of Interaction Design, User Experience Design and Digital Design.

Key Skills

- Programming Language Skills: HTML5, XML, PHP, CSS, JAVA, JavaScript, JSON, JQuery, Actionscript 2&3, Objective-C, swift & Python.
